The status of the claims is as follows:

Claims 8, 16, and 19 are withdrawn from consideration;

Claims 10-15, 18 and 21-28 have been cancelled; and

Claims 1-7, 9, 17, 20, 29, and 30 are herein addressed below.

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 7 is rejected for failing to further limit the claimed subject matter, i.e., "fabric covering".

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7, 9, 17, 20, 29, and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clark (2,878,532) in view of Reilly et al. (4,961,454). Clark ('532) discloses two panels (C and D), an actuating system (chains, pulleys, motor, inclined guide track), which moves the panels (C and D) between an open and closed sealed position. Clark fails to disclose the panels to be formed of resilient foam having a covering. Reilly et al. (4,961,454) disclose an impact-absorbing panel formed of foam and having a flexible fabric outer covering. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the panels of Clark ('532)

to be impact absorbing as taught by Reilly et al. (4,961,454) since this allows the panels to be resilient upon an impact without damaging the panel itself.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. patents to Kloote et al. and Holtrop et al. disclose panel structure elements similar to that of the applicant's invention.

Applicant's arguments with respect to claims 1-7, 9, 17, 20, 29, and 30 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
